

USER INSTRUCTIONS

Locking devices

LL-210, LL-310

LL-210

LL-210

LL-310

Uses

Locking devices are meant to prevent lever-based shears, manual shears, plate mangles, press brakes, etc., from being used improperly.

Dimensions

The device measures 270 mm x 90 mm x 40 mm, and it has a total mass of approx. 2 kg.

Installation

The fastening console's adjustment grooves enable the locking device to be mounted on several different kinds of devices. Place the lever or some other part needing to be locked in the protruding part and screw the console onto the frame using M8 screws.

Operation

Set the lock into open position using the key and place the part to be locked through the protruding part. The protruding part then locks when the lock case is pressed down.

Inspection and maintenance

Ensure the functioning of the locking and the tightness of the screws during operation.

The warranty period is two (2) years from the date of purchase.
